HOW TO READ A FACTSHEET

AUM

AUM or assets under management refers to the recent/updated cumulative market value of investments managed by a mutual fund or any investment firm.

NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

BENCHMARK

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE 200, BSE 500, 10-Year G-sec.

NATURE OF SCHEME

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of the categories may have sub-categories.

APPLICATION AMOUNT FOR FRESH SUBSCRIPTION

This is the minimum investment amount for a new investor in a mutual fund scheme

MINIMUM ADDITIONAL AMOUNT

This is the minimum investment amount for an existing investor in a mutual fund scheme.

EXIT LOAD

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹100 and the exit load is 1%, the redemption price would be ₹99 Per Unit.

YEILD TO MATURITY

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

MODIFIED DURATION

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield..

STANDARD DEVIATION

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

SHARPERATIO

The Sharpe ratio named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

BETA

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AXIS LARGE CAP FUND

(An Open Ended Equity Scheme Predominantly Investing In Large Cap Stocks)

FACTSHEET

November 2023

INVESTMENT OBJECTIVE: To achieve long term capital appreciation by investing in a diversified portfolio predominantly consisting of equity and equity related securities of Large cap companies including derivatives. There is no assurance that the investment objective of the Scheme will be achieved

QUICK TAKE

Markets do remain overvalued across the investment part of the economy and we may see normalisation in some of these segments.

We remain bullish on equities from a medium to long term perspective.

Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

KEY HIGHLIGHTS

Equity Review

Indian equities extended their winning streak for the third consecutive month, reaching fresh all-time highs and surpassing the previous peak recorded in September 2024. Over the past three months, benchmark indices have gained around 7.3%, driven by optimism around an impending turnaround in the earnings cycle and expectations of lower interest rates from both the Reserve Bank of India and the US Federal Reserve. The BSE Sensex and Nifty 50 ended the month with gains of 2.1% and 1.9%, respectively. The NSE Midcap 100 rose by 2% while the NSE Smallcap 100 declined by 3%. At a sector level, IT, auto and banks lead the gains while realty, power and metals ended in the negative.

However, despite the highs, Foreign Portfolio Investors (FPIs) sold equities to the tune of US\$0.4bn while Domestic Institutional Investors (DII) remained supportive with US\$8.7bn in equity purchases. Year to date, FPI outflows total US\$16bn while the DIIs bought to the tune of US\$81.4bn.

Key highlights of the month

Earnings indicate recovery around the corner : 2QFY26 results of the Nifty 500 companies shows modest revenue growth (+6% yoy) in the broader universe. However, EBITDA grew 17% yoy, while PAT grew 15% yoy. Metals and oil, gas & consumable fuels drove the strong yoy growth in EBITDA and PAT in aggregate; EBITDA and PAT growth was around 8% yoy, excluding them. Interestingly, quarterly PAT levels have been stagnant around Rs3.6 tn for six quarters. Nonetheless, there were signs of improvement with 17/30 sectors reporting double-digit sales growth.

The contribution of the top-100 companies to revenues of the Nifty 500 Index universe has remained stable at around 70%, while the contribution to PAT has moderated to 73%. Sales growth remains weak across market caps, even as mid- and small-caps delivered strong EBITDA and PAT growth.

Lenders are benefiting from accelerating credit growth, stabilizing NIMs, operating leverage, contained credit costs, and healthy asset quality across segments. Consumer staples remained resilient, supported by premiumization, while consumer durables saw strong demand for cables but softer demand for cooling products. Discretionary categories such as jewelry, paints, and QSRs gained from festive strength, and retail posted broad-based improvements in footfalls and ticket sizes—together signaling a firm consumption backdrop heading into the second half. Autos delivered mid-single-digit growth with premiumization intact, and tractors rebounded on favorable rains. Metals faced steel price pressure, while non-ferrous remained firm.

GDP growth surprises positively : Real GDP growth for QE Sep-25 touched a 6-quarter high of 8.2% YoY vs. 7.8% in QE Jun-25. This surge was partly aided by a favourable low base and the statistical effect of low inflation on the real growth rate. The GVA (supply-side estimate) was stronger than expected at 8%, up from 7.6% last quarter. Importantly, nominal growth edged down a little to 8.7% in QE Sep-25 vs. 8.8% in QE Jun-25.

The upside surprise mainly came from services (including construction), registering growth of 9.2% YoY in 2QFY26, unchanged from the previous quarter. Financial, real estate and professional services (+10.2% YoY) along with public administration, defence, and other services (+9.7%; estimate: 6%) led growth. On the expenditure side private consumption led growth (+7.9% YoY). Investment growth moderated for the second successive quarter albeit steady at 7.3% YoY. Although central government capex was robust, slowdown could be attributed to muted state government capex and private capex.

Trade negotiations could see some resolution : After months of impasse, India could soon conclude on the tariffs stalemate with the US. Improving India-US relations, including a new 10-year defense agreement and reduced imports of Russian oil, raise the likelihood of tariff resolution. A successful conclusion could unlock greater market access for Indian exporters,

reduce tariff-related uncertainties, and encourage global firms to deepen manufacturing and sourcing partnerships with India across high-value sectors.

Equity Supply continues to surge : Equity supply remained strong with US\$56bn year-to-date and US\$7 billion in November alone, supported by a robust IPO pipeline. While absorption has been steady so far, the accelerating pace of issuance could start testing market depth.

Valuations up, premium to EM close to historical averages : Valuations have come up given the rally and continue to trade at least one standard deviation above long-term averages in the case of large and midcap and two standard deviation in the case of small caps. Midcap premium to Nifty continues to remain elevated at ~ 40% vs 10- year average of 25%, while small cap premium of 27% remains near highs. Compared to the emerging markets, valuations are close to long term averages.

Outlook & Positioning

The recently concluded earnings season indicates that a recovery in corporate earnings may be on the horizon with most companies reporting stable performance. Festive demand provided a strong boost to discretionary categories, but the key question is whether this momentum can sustain beyond the seasonal uptick. At the macro level, GDP data reflects a notable transition from an investment-driven cycle to one led by consumption, signaling a shift in drivers of India's growth.

Looking ahead to 2026, the outlook appears cautiously optimistic. A potential resolution to the ongoing trade impasse between the US and India could boost equities and further support economic growth. Combined with improving domestic consumption trends and stable corporate earnings, these factors reinforce confidence in a gradual but steady recovery trajectory. However, sustaining demand and navigating global uncertainties will remain critical for maintaining this positive momentum.

Against this backdrop, we maintain an overweight stance on consumption. The positive impact of GST rationalization is seen across consumer discretionary. Companies across consumer durables and automobiles have reported strong festive-season sales. We also remain constructive on other consumer discretionary plays—especially in retail, hospitality, and travel & tourism—which are poised to gain from strengthening domestic momentum.

We maintain an overweight in automobiles supported by GST reforms and swift benefit pass through to consumers. The trend toward premiumization is expected to strengthen, supported by a pickup in the replacement cycle. We anticipate that aspirational product segments will benefit more due to higher demand elasticity. While improved affordability will encourage first-time buyers, we believe the revival in replacement demand—muted in recent years—will be a more significant growth driver for passenger vehicles. Recent numbers suggest that the sector reported a robust set of wholesale figures, with most segments posting strong growth. Wholesale volumes across auto segments grew in strong double digits, driven by GST cuts and improved consumer sentiment. Retail trends remained strong across segments, suggesting sustained momentum following the festive season. Exports also remained strong across the 2W, PV and CV segments.

We are overweight NBFCs within financials as these are well-positioned to benefit from increased credit demand and improved liquidity conditions. Furthermore, we are overweight pharmaceuticals. Better clarity on US tariffs/pricing, clear evidence of industry pipeline momentum, and subdued valuations versus historical averages, are all sector positives. We remain underweight in IT given the cautious environment in the US. Additionally, we are positive on structural themes such as renewable capex, power transmission, and defense. Overall, India continues to offer a compelling medium- to long-term growth opportunity, supported by resilient domestic demand, a favorable rural outlook post-monsoon, and supportive macroeconomic indicators.

Exit Load:	If redeemed/switched out within 7 days from the date of investment/allotment: 0.25%, If redeemed/switched out after 7 days from the date of investment/allotment: Nil

Since the fund has not completed 1-year, tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitory in nature and normalizes as the fund completes 1 year since fund launch.

^{^^}Market caps are defined as per SEBI regulations as below: a. Large Cap: 1st -100th company in terms of full market capitalization. b. Mid Cap: 101st - 250th company in terms of full market capitalization. c. Small Cap: 251st company onwards in terms of full market capitalization.

Since the fund has not completed 1-year, tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitory in nature and normalizes as the fund completes 1 year since fund launch.

^{^^}Market caps are defined as per SEBI regulations as below: a. Large Cap: 1st - 100th company in terms of full market capitalization. b. Mid Cap: 101st - 250th company in terms of full market capitalization. c. Small Cap: 251st company onwards in terms of full market capitalization.

AXIS NIFTY500 VALUE 50 INDEX FUND

(An Open-Ended Index Fund tracking Nifty500 Value 50 TRI)

FACTSHEET
November 2025

INVESTMENT OBJECTIVE: To provide returns before expenses that correspond to the Nifty500 Value 50 TRI subject to tracking error. There is no assurance that the investment objective of the scheme will be achieved.

(as on 28th November, 2025)

Period	1 Year		3 Years		5 Years		Since Inception		Date of Inception
	CAGR(%)	Current Value of Investment of ₹10,000/-	CAGR(%)	Current Value of Investment of ₹10,000/-	CAGR(%)	Current Value of Investment of ₹10,000/-	CAGR(%)	Current Value of Investment of ₹10,000/-	
Axis Nifty500 Value 50 Index Fund - Regular - Growth	5.56%	10,555	NA	NA	NA	NA	4.74%	10,521	
NIFTY 500 Value 50 TRI (Benchmark)	6.77%	10,675	NA	NA	NA	NA	5.95%	10,654	24-Oct-24
Nifty 50 TRI (Additional Benchmark)	9.97%	10,994	NA	NA	NA	NA	8.07%	10,888	
Axis Nifty500 Value 50 Index Fund - Direct - Growth	6.49%	10,648	NA	NA	NA	NA	5.67%	10,623	
NIFTY 500 Value 50 TRI (Benchmark)	6.77%	10,675	NA	NA	NA	NA	5.95%	10,654	24-Oct-24
Nifty 50 TRI (Additional Benchmark)	9.97%	10,994	NA	NA	NA	NA	8.07%	10,888	

Past performance may or may not be sustained in future. Different plans have different expense structure. Karthik Kumar is managing the scheme since 24th October 2024 and he manages 25 schemes of Axis Mutual Fund. Please refer to annexure on Page 135 for performance of all schemes managed by the fund manager. Returns greater than 1 year period are compounded annualised (CAGR). Face Value per unit: ₹10.

ENTRY & EXIT LOAD	
Entry Load:	NA
Exit Load:	If redeemed/ switched out within 15 days from the date of allotment: 0.25%, If redeemed/ switched out after 15 days from the date of allotment: Nil

Since the fund has not completed 1-year, tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitory in nature and normalizes as the fund completes 1 year since fund launch.

^{^^}Market caps are defined as per SEBI regulations as below: a. Large Cap: 1st - 100th company in terms of full market capitalization. b. Mid Cap: 101st - 250th company in terms of full market capitalization. c. Small Cap: 251st company onwards in terms of full market capitalization.

FIXED INCOME

OUTLOOK
DECEMBER 2025

QUICK TAKE

- Expect a pause post the December rate cut.
- Yield upside limited; investors should add short term bonds with every rise in yields.
- Short term 2-5-year corporate bonds, tactical mix of 8-10 yr Gsecs and income plus arbitrage are best strategies to invest in the current macro environment.
- Selective Credits continue to remain attractive from a risk reward perspective given the improving macro fundamentals.

Bond yields traded in a narrow range over the month with the 10-year benchmark government bond yield declining 4 basis points to end at 6.49%. US Treasury yields edged lower, with the 10-year yield ending the month at 4.01%, anticipating interest rate cuts by the US Federal Reserve (Fed) in its December policy.

Key Market Events

RBI lowers rates in December policy : The Monetary Policy Committee (MPC) of the Reserve Bank of India (RBI) lowered interest rates by 25 bps to 5.25% and maintained a neutral stance. This decision was shaped by a “goldilocks” backdrop—robust growth and exceptionally low inflation despite a weaker currency.

10 YEAR G-SEC YIELD
6.53%

Banking liquidity fluctuates : Banking system liquidity narrowed during the month due to GST collections and continued RBI OMOs. The final tranche of the CRR cut took place in end of November. In the December policy, to proactively address tightening pressures, the RBI will inject liquidity into the banking system in December 2025 through two key operations – (a) OMO purchase auctions of Government of India securities for an aggregate amount of Rs 1 lac cr, split in two tranches of Rs 50,000 cr each to be held on December 11, 2025, and December 18, 2025 (b) USD/INR Buy/Sell Swap auction of US\$ 5 billion for a tenor of three years to be held on December 16, 2025, and improved liquidity.

Inflation at an all time low : Headline inflation eased to 0.25% in October vs 1.54% in September driven by a favorable base effect, continued moderation in food prices, and the impact of GST rate adjustments. This is the lowest Retail print in the new series. Core inflation was marginally lower at 4.4% vs 4.5% driven mainly by higher gold prices.

GDP data surprises positively : Real GDP growth for QE Sep-25 touched a 6-quarter high of 8.2% YoY vs. 7.8% in QE Jun-25. This surge was partly aided by a favourable low base and the statistical effect of low inflation on the real growth rate. The GVA (supply-side estimate) was stronger than expected at 8%, up from 7.6% last quarter. Importantly, nominal growth edged down a little to 8.7% in QE Sep-25 vs. 8.8% in QE Jun-25.

US treasury yields fall : The yields on US Treasuries fell 6 bps with the 10 year yield closing at 4.01%. There are increasing expectations of a rate cut by the Fed in its December policy given weak labour markets.

Market view

After the Fed's anticipated rate cut in October, we expect another reduction in December. We believe this does not signal the end of the rate-cutting cycle. Current US conditions point to weakening economic indicators, particularly in unemployment data.

In the run-up to the policy, we highlighted the unique macro environment: inflation near record lows, growth at a six-quarter high and the rupee at an all-time low. These factors contributed to heightened market uncertainty and made the policy outcome particularly pivotal. The RBI's policy outcome of 25 bps rate cut closely mirrors our expectations, with a focus on supporting growth amid benign inflation. The neutral stance and liquidity measures reinforce an accommodative environment, setting the stage for a “lower for longer” rates regime. The central bank's neutral stance, coupled with the rate cut and liquidity guidance through tools such as OMOs and FX swaps, aligns closely with our expectations. Going forward, due to fx interventions and increased currency in circulation, we anticipate surplus liquidity to be closer to neutral and these measures will help maintain surplus liquidity.

With 100 bps of repo rate cuts already delivered, we believe the majority of the RBI's rate easing is now behind us. We believe that the best of the duration play is behind us. Looking ahead, with limited scope for further aggressive rate cuts, we expect the RBI to maintain its accommodative liquidity stance (+1% NDTL). This should continue to support the shorter end of the yield curve. From a medium-term perspective, we favor accrual strategies over duration plays. We expect 10yr GSec to trade in a range of 6.4-6.6% for the remaining part of the financial year.

In the near term, markets will be guided by lower inflation, strong growth, OMOs in December and possibility of inclusion in Bloomberg indices, which may provide a tactical opportunity for long bond investing.

Risks to our view: The risks to our view at this point are as below

- 1) Currency
- 2) Growth shocks globally and in India

Strategy – We have gradually reduced duration in our portfolios since February 2025 transitioning from long duration strategies to accrual-based strategies.

We have been focused on the short term 2-5 year corporate bonds in the portfolio as we expect surplus banking liquidity, lower supply of corporate bonds/ CDs due to slowdown and delay in implementation of LCR guidelines and attractive spreads and valuations. Incrementally short bonds can outperform long bonds from risk-reward perspective due to a shallow rate cut cycle, lower OMO purchases in the second half of the year and a shift in focus to Govt Debt to GDP targets.

What should investors do?

- In line with our core macro view, we continue to advise short- to medium-term funds with tactical allocation of gilt funds to our clients.

AXIS OVERNIGHT FUND

(An open ended debt scheme investing in overnight securities. A relatively low interest risk & relatively low credit risk)

FACTSHEET
November 2025

INVESTMENT OBJECTIVE: The investment objective of the Scheme is to provide reasonable returns commensurate with very low interest rate risk and providing a high level of liquidity, through investments made primarily in overnight securities having maturity/residual maturity of 1 business day. There is no assurance that the investment objective of the Scheme will be achieved.

*As per AMFI Best Practices Guidelines Circular No. 88 / 2020 -21-Additional Disclosures in Monthly Factsheets. For instruments with put/call option, the put/call date has been taken as the maturity date. ⁶ The yield to maturity given above is based on the portfolio of funds as on date given above. This should not be taken as an indication of the returns that may be generated by the fund and the securities bought by the fund may or may not be held till their respective maturities. The calculation is based on the invested corpus of the debt portfolio.

AXIS ULTRA SHORT DURATION FUND

FACTSHEET
November 2025

(An open ended ultra-short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 3 months and 6 months. A moderate interest rate risk and moderate credit risk.)

INVESTMENT OBJECTIVE: The investment objective of the Scheme is to generate regular income and capital appreciation by investing in a portfolio of short term debt and money market instruments with relatively lower interest rate risk such that Macaulay duration of the portfolio is between 3 months and 6 months. There is no assurance that the investment objective of the Scheme will be achieved.

AXIS TREASURY ADVANTAGE FUND

(An open ended low duration debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 6 to 12 months. A relatively high interest rate risk and moderate credit risk)

FACTSHEET
November 2025

INVESTMENT OBJECTIVE: The investment objective is to provide optimal returns and liquidity to the investors by investing primarily in a mix of money market and short term debt instruments which results in a portfolio having marginally higher maturity as compared to a liquid fund at the same time maintaining a balance between safety and liquidity. There can be no assurance that the investment objective of the scheme will be achieved.

HYBRID

OUTLOOK ₹ 
DECEMBER 2025

Quick Take - Equity

- Markets do remain overvalued across the investment part of the economy and we may see normalisation in some of these segments.
- We remain bullish on equities from a medium to long term perspective.
- Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

Quick Take - Fixed Income

- Expect a pause post the December rate cut.
- Yield upside limited; investors should add short term bonds with every rise in yields.
- Short term 2-5-year corporate bonds, tactical mix of 8-10 yr Gsecs and income plus arbitrage are best strategies to invest in the current macro environment.
- Selective Credits continue to remain attractive from a risk reward perspective given the improving macro fundamentals.

KEY HIGHLIGHTS

Indian equities extended their winning streak for the third consecutive month, reaching fresh all-time highs and surpassing the previous peak recorded in September 2024. Over the past three months, benchmark indices have gained around 7.3%, driven by optimism around an impending turnaround in the earnings cycle and expectations of lower interest rates from both the Reserve Bank of India and the US Federal Reserve. The BSE Sensex and Nifty 50 ended the month with gains of 2.1% and 1.9%, respectively. The NSE Midcap 100 rose by 2% while the NSE Smallcap 100 declined by 3%. At a sector level, IT, auto and banks lead the gains while realty, power and metals ended in the negative.

Bond yields traded in a narrow range over the month with the 10-year benchmark government bond yield declining 4 basis points to end at 6.49%. US Treasury yields edged lower, with the 10-year yield ending the month at 4.01%, anticipating interest rate cuts by the US Federal Reserve (Fed) in its December policy.

Key Market Events

Earnings indicate recovery around the corner : 2QFY26 results of the Nifty 500 companies shows modest revenue growth (+6% yoy) in the broader universe. However, EBITDA grew 17% yoy, while PAT grew 15% yoy. Metals and oil, gas & consumable fuels drove the strong yoy growth in EBITDA and PAT in aggregate; EBITDA and PAT growth was around 8% yoy, excluding them. Interestingly, quarterly PAT levels have been stagnant around Rs3.6

tn for six quarters. Nonetheless, there were signs of improvement with 17/30 sectors reporting double-digit sales growth.

GDP growth surprises positively : Real GDP growth for QE Sep-25 touched a 6-quarter high of 8.2% YoY vs. 7.8% in QE Jun-25. This surge was partly aided by a favourable low base and the statistical effect of low inflation on the real growth rate. The GVA (supply-side estimate) was stronger than expected at 8%, up from 7.6% last quarter. Importantly, nominal growth edged down a little to 8.7% in QE Sep-25 vs. 8.8% in QE Jun-25.

The upside surprise mainly came from services (including construction), registering growth of 9.2% YoY in 2QFY26, unchanged from the previous quarter. Financial, real estate and professional services (+10.2% YoY) along with public administration, defence, and other services (+9.7%; estimate: 6%) led growth. On the expenditure side private consumption led growth (+7.9% YoY). Investment growth moderated for the second successive quarter albeit steady at 7.3% YoY. Although central government capex was robust, slowdown could be attributed to muted state government capex and private capex.

Trade negotiations could see some resolution | After months of impasse, India could soon conclude on the tariffs stalemate with the US. Improving India-US relations, including a new 10-year defense agreement and reduced imports of Russian oil, raise the likelihood of tariff resolution. A successful conclusion could unlock greater market access for Indian

KEY HIGHLIGHTS

exporters, reduce tariff-related uncertainties, and encourage global firms to deepen manufacturing and sourcing partnerships with India across high-value sectors.

RBI lowers rates in December policy : the Monetary Policy Committee (MPC) of the Reserve Bank of India (RBI) lowered interest rates by 25 bps to 5.25% and maintained a neutral stance. This decision was shaped by a “goldilocks” backdrop—robust growth and exceptionally low inflation despite a weaker currency.

Banking liquidity fluctuates: Banking system liquidity narrowed during the month due to GST collections and continued RBI OMOs. The final tranche of the CRR cut took place in end of November. In the December policy, to proactively address tightening pressures, the RBI will inject liquidity into the banking system in December 2025 through two key operations – (a) OMO purchase auctions of Government of India securities for an aggregate amount of Rs 1 lac cr, split in two tranches of Rs 50,000 cr each to be held on December 11, 2025, and December 18, 2025 (b) USD/INR Buy/Sell Swap auction of US\$ 5 billion for a tenor of three years to be held on December 16, 2025.

Equity Market View:

The recently concluded earnings season indicates that a recovery in corporate earnings may be on the horizon with most companies reporting stable performance. Festive demand provided a strong boost to discretionary categories, but the key question is whether this momentum can sustain beyond the seasonal uptick. At the macro level, GDP data reflects a notable transition from an investment-driven cycle to one led by consumption, signaling a shift in drivers of India's growth.

Looking ahead to 2026, the outlook appears cautiously optimistic. A potential resolution to the ongoing trade impasse between the US and India could boost equities and further support economic growth. Combined with improving domestic consumption trends and stable corporate earnings, these factors reinforce confidence in a gradual but steady recovery trajectory. However, sustaining demand and navigating global uncertainties will remain critical for maintaining this positive momentum.

Against this backdrop, we maintain an overweight stance on consumption. The positive impact of GST rationalization is seen across consumer

discretionary. Companies across consumer durables and automobiles have reported strong festive-season sales. We also remain constructive on other consumer discretionary plays—especially in retail, hospitality, and travel & tourism—which are poised to gain from strengthening domestic momentum.

Debt Market View:

After the Fed's anticipated rate cut in October, we expect another reduction in December. We believe this does not signal the end of the rate-cutting cycle. Current US conditions point to weakening economic indicators, particularly in unemployment data.

In the run-up to the policy, we highlighted the unique macro environment: inflation near record lows, growth at a six-quarter high and the rupee at an all-time low. These factors contributed to heightened market uncertainty and made the policy outcome particularly pivotal. The RBI's policy outcome of 25 bps rate cut closely mirrors our expectations, with a focus on supporting growth amid benign inflation. The neutral stance and liquidity measures reinforce an accommodative environment, setting the stage for a “lower for longer” rates regime. The central bank's neutral stance, coupled with the rate cut and liquidity guidance through tools such as OMOs and FX swaps, aligns closely with our expectations. Going forward, due to fx interventions and increased currency in circulation, we anticipate surplus liquidity to be closer to neutral and these measures will help maintain surplus liquidity.

With 100 bps of repo rate cuts already delivered, we believe the majority of the RBI's rate easing is now behind us. We believe that the best of the duration play is behind us. Looking ahead, with limited scope for further aggressive rate cuts, we expect the RBI to maintain its accommodative liquidity stance (+1% NDTL). This should continue to support the shorter end of the yield curve. From a medium-term perspective, we favor accrual strategies over duration plays. We expect 10yr GSec to trade in a range of 6.4-6.6% for the remaining part of the financial year.

In the near term, markets will be guided by lower inflation, strong growth, OMOs in December and possibility of inclusion in Bloomberg indices, which may provide a tactical opportunity for long bond investing.

AXIS CONSERVATIVE HYBRID FUND

FACTSHEET

November 2025

(An open ended hybrid scheme investing predominantly in debt instruments)

INVESTMENT OBJECTIVE: The Scheme seeks to generate regular income through investments in debt & money market instruments, along with capital appreciation through limited exposure to equity and equity related instruments. There is no assurance that the investment objective of the Scheme will be achieved.

ENTRY & EXIT LOAD

Entry Load:	NA
Exit Load:	If redeemed / switched-out within 12 months from the date of allotment, For 10% of investments: Nil. For remaining investments: 1%. If redeemed / switched - out after 12 months from the date of allotment: NIL.

**Risk-free rate assumed to be 5.59% (MIBOR as on 30-11-2025) - Source: www.fimmda.org

*As per AMFI Best Practices Guidelines Circular No. 88 / 2020 -21-Additional Disclosures in Monthly Factsheets. @Based on debt portfolio only. For instruments with put/call options, the put/call data has been taken as the maturity data. This should not be taken as an indication of the returns that maybe generated by the fund and the securities bought by the fund may or may not be held till their respective maturities. The calculation is based on the invested corpus of the debt portfolio.

AXIS ARBITRAGE FUND

(An Open Ended Scheme Investing In Arbitrage Opportunities)

FACTSHEET

November 2025

INVESTMENT OBJECTIVE: To generate income through low volatility absolute return strategies that take advantage of opportunities in the cash and the derivative segments of the equity markets including the arbitrage opportunities available within the derivative segment, by using other derivative based strategies and by investing the balance in debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved. The Scheme does not assure or guarantee any returns.

Please refer to annexure on Page 135 for performance of all schemes managed by the fund manager. Returns greater than 1 year period are compounded annualised (CAGR). Face Value per unit : ₹10.

ENTRY & EXIT LOAD

Entry Load: NA
Exit Load: Nil

*As per AMFI Best Practices Guidelines Circular No. 88 / 2020 -21-Additional Disclosures in Monthly Factsheets. @Based on debt portfolio only. For instruments with put/call options, the put/call data has been taken as the maturity data. This should not be taken as an indication of the returns that may be generated by the fund and the securities bought by the fund may or may not be held till their respective maturities. The calculation is based on the invested corpus of the debt portfolio.

AXIS RETIREMENT FUND - DYNAMIC PLAN

(An open-ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier))

FACTSHEET
November 2025

INVESTMENT OBJECTIVE: The investment objective of the Investment Plan(s) under the Scheme is to provide long-term capital appreciation / income by investing in a mix of equity, debt and other instruments to help investors meet their retirement goals. There is no assurance that the investment objective of the Scheme will be achieved. The Investment Plan has a dual objective of generating capital appreciation by investing in equity and equity related securities as well as generating income by investing in debt and money market securities, while attempting to manage risk from the market through active asset allocation. The Investment Plan may also invest in units of Gold ETF or units of REITs & InvITs for income generation / wealth creation.

Please refer to the Annexure for returns of all the schemes managed by them.

SIP PERFORMANCE OF SELECT SCHEMES (as on November 30, 2025)

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time. SIP returns are computed after accounting for cash flow by using XIRR method (investment internal rate of return).*

Axis Balanced Advantage Fund - Regular Plan - Growth Option

SIP Investments	Since Inception SIP	5 Year SIP	3 Year SIP	1 Year SIP
Total Amount Invested	10,00,000	6,00,000	3,60,000	1,20,000
