HOW TO READ A MUTUAL FUND FACTSHEET?

Do you know your Mutual Fund investment portfolio?

Do you know where your money is invested, or which stocks and sectors were added/removed after you invested in the fund?

Do you know your fund manager and his past performance?

Do you keep up with changes happening with your investments?

As an investor, you should seek answers to these questions before & after investing in a particular Mutual Fund. The Mutual Fund factsheet is a crucial source of information, facts, terminologies, figures, and disclosures that every investor should be aware of while investing in a particular fund.

IMPORTANCE OF A MUTUAL FUNDS FACTSHEET

- › For potential investors, it is necessary to check a mutual fund from various aspects before investing. A mutual fund factsheet helps to understand the risk, return, the fund's objective, portfolio allocation, etc.
- › With growing awareness about investments and the active promotion of mutual fund schemes, some investors may get trapped by misinterpreting mutual funds. Carefully reading a factsheet may help them understand the pros and cons of a scheme, which may help them to choose only those that suit their investment objectives and avoid others.

COMPONENTS OF A MUTUAL FUNDS FACT SHEET

BASIC FUND INFORMATION

A mutual fund factsheet usually contains the following basic information about the fund.

- › **Investment objective:** It could be to generate capital appreciation, provide regular income, offer liquidity to investors, etc.
- › **Category:** The category of the fund is specified. For e.g., equity, debt or hybrid scheme, and sub-categories like large-cap, mid-cap, small-cap, multi-cap equity scheme, conservative hybrid scheme or aggressive hybrid scheme, etc.
- › **Type of scheme:** It could be an open-ended, close-ended or interval scheme, growth or dividend fund, liquidity fund, etc.
- › **Assets under management:** The total sum of the market value of all securities in the scheme.
- › Benchmark index against which the performance of the scheme can be compared.
- › The minimum amount of investments required for a lump sum or a Systematic Investment Plan (SIP).
- › **Exit load:** An investor would need to pay charges for redeeming mutual fund units or exiting the mutual fund scheme.
- › **Riskometer:** It indicates the level of risk involved in the concerned mutual fund. The needle of the risk-o-meter points to the amount of risk involved, which can be low, low to moderate, moderate, moderately high, high or very high.

PORTFOLIO ALLOCATION

Mutual funds involve an investment of pooled money across various assets and sectors. The mutual fund factsheet constitutes crucial information about the portfolio allocation, which can give you the answer to the following questions:

- › In which assets is the money being invested?
- › What percentage of net assets is invested in which assets/securities?
- › In which industries/ sectors is the money being invested?
- › What percentage of net assets is invested in which industries?
- › What percentage of net assets is invested in which companies?
- › How much cash is idle?

PERFORMANCE ANALYSIS

Another crucial part of a mutual fund factsheet is the details of the fund's historical performance. Usually, this part includes a comparison of scheme returns, SIP returns, returns against the benchmark, and the overall return of the market for one year, three years, five years, ten years or more.

DETAILS ABOUT THE FUND MANAGER

The mutual fund factsheet includes details about the fund manager's qualifications and experience. It may also contain information about the historical returns of the funds managed by the fund manager.

It is important to understand the factsheet because fund managers will analyse market trends, make investment strategies and ensure legal compliance. They are going to make investment decisions which can have a significant impact on returns generated by mutual funds.

CONCLUSION

You don't have to be a market expert to stay on top of your investments. However, it is important to learn some basics even when you consult a professional. You can start with a mutual fund factsheet and read more about mutual funds and their working. The factsheets are fairly easy to read and provide deep insight into your mutual fund working.

Dear Investors,

As we wrap up 2025, it's natural to look back at the year gone by; primarily the challenges, opportunities, and lessons in 2025. For us in the financial industry, one insight stands out above all: the future of investing lies in **simplicity, accessibility, and immediacy**. And that's why **small-denomination SIPs (Pocket SIPs)** are not just innovative features but catalysts for a cultural shift in how people approach wealth creation.

This year, we witnessed a remarkable evolution in investor behaviour. Technology continued to redefine convenience, and expectations changed accordingly. People no longer want investments to be a complex, time-consuming activity. They want it to be as easy as ordering groceries online or booking a cab. **LIC MF's Insta SIP facility** of investing through **SIP via UPI Autopay** answers that call. It brings investing into the era of instant action, where intent meets execution in seconds.

But convenience alone isn't enough. **The other barrier we've broken this year is the myth that investing requires large sums.** For decades, this misconception kept millions staying away from starting their financial journey. **Pocket SIPs** challenged that belief head-on. They say, **"Start with what you have be it ₹100, ₹200, or ₹1,000"**. Individually, these amounts may seem small, but they carry immense power when invested consistently.

Small Steps, Big Impact

We often celebrate big-ticket investments, but the truth is, wealth creation is rarely about one big decision. It's about **a series of small, disciplined actions taken over time**. A ₹500 SIP may feel insignificant today, but over years, it builds a habit that compounds into confidence and financial security. This year, thousands of investors took that first step through **Insta SIP** and small-ticket investments. Each of those steps matters. Each one is a seed planted for a future of possibilities. And that's what makes this movement so powerful is that it's about democratizing investing for everyone, the last mile.

The hardest part of investing is starting. People procrastinate, waiting for the "right time" or fearing market volatility. In a study by American Psychology Association, it has been found that **"80% of individuals procrastinate on long-term decisions, even when they know it benefits them."** **Insta SIP removes that hurdle.** It leverages the psychology of immediacy which is transforming the impulse to "do something" into a constructive financial decision. In a world where everything is instant food, instant entertainment, instant travel, why should investing be any different? **Small denomination SIPs (Pocket SIPs) also check emotional biases.** When the entry barrier is low, the fear of loss diminishes, and the likelihood of staying invested increases. Over time, this creates a disciplined approach that outperforms sporadic lump-

sum investments.

Pocket SIPs are not just financial tools, but they are instruments of inclusion. They empower young professionals, gig workers, and first-time investors to participate in wealth creation without waiting for "enough money." This is how we build a financially literate and secure society by making investing simple, affordable, and immediate.

Looking Ahead: Our Commitment

As we step into a new year, our mission remains clear: **to simplify investing and make it inclusive**. We will continue to innovate, educate, and empower because financial freedom should not be a privilege; it should be a possibility for all. Our focus will be on leveraging technology, behavioural insights, and customer-centric design to make investing as natural as saving.

The journey to financial success is a marathon, not a sprint. And every marathon begins with a single step. If you haven't taken that step yet, now is the time.

Let's make 2026 the year of action, discipline, and growth, together!

Happy Investing!

Mr. Yogesh Patil
Chief Investment Officer - Equity

EQUITY

Market Review

- Indian equities recorded modest gains in December, buoyed by favorable inflation data, optimism over a potential India–US trade agreement, and rate cut expectations. The Nifty 50 index advanced 1.9%, while the Nifty Midcap 150 climbed 1.6%. In contrast, the Nifty Smallcap 250 fell 3.4%, reflecting selective investor sentiment following last month's rally.
- Sectoral performance was mixed. Outperformers included IT (3.69%), Auto (3.14%), and Banking (3.10%), which benefited from improving demand outlook and stable macros, while Consumer Durables (2.16%) also posted gains on festive season tailwinds. On the other hand, Healthcare (0.80%) FMCG (-1.22%), Oil & Gas (-1.51%), Capital Goods (-1.70%), Metals (-2.89%), Power (-4.51%), and Realty (-4.69%) faced pressure thereby underperforming the index.
- Inflation continued to ease, with CPI (Consumer Price Index) inflation declining to a record low of 0.25% in October 2025, driven by persistent food deflation and partially on account of the GST rationalisation. WPI (Wholesale Price Index) inflation eased to -1.21% (YoY) reflecting a decline in prices of key items including food articles, crude petroleum and natural gas, electricity, mineral oils, and basic metal manufacturing etc.

Capital Flows:

- In November 2025, domestic institutional investors were net buyers, investing ₹ 77,084 crore. Over the past 12 months, domestic institutional investors have recorded cumulative net purchases of ₹ 742,759 crore. Foreign institutional investors were net sellers in November 2025, with net selling of ₹ 3,765 crore (approximately USD 0.4 billion). For the past 12 months, foreign institutional investors registered a net outflow of ₹ 1,28,229 crore (approximately USD 14.5 billion). (November 2025 Avg, 1 USD = INR 88.8).

Market Outlook

- Amid ongoing uncertainty surrounding global trade policies and concerns about their domestic implications, the Indian economy has remained resilient to external shocks. This strength is underpinned by robust services exports, healthy remittance inflows, and favorable oil prices.
- India's economy posted a stronger-than-expected growth of 8.2% in Q2FY26, driven by broad-based improvements across sectors. The expansion was supported by a favorable statistical base and a low deflator, while easing food inflation boosted discretionary spending and strengthened private consumption. Although global softness, tariff-related effects, and weaker nominal growth could keep momentum in check, the outlook remains constructive. Factors such as a benign inflation environment, GST rationalization, tax relief measures, sustained rural resilience, improving urban demand indicators, and the potential for further monetary easing are expected to underpin economic activity in the coming quarters.
- The Reserve Bank of India's Monetary Policy Committee unanimously voted to cut the repo rate by 25 basis points to 5.25%, while maintaining a neutral policy stance. The decision was supported by a benign inflation outlook across both headline and core inflation. Additionally, the FY26 growth forecast has been revised upward to 7.3% from 6.8%, with the second half of FY26 upgraded by 45 basis points to 6.8%, driven by stronger-than-expected growth in the first half, the positive impact of GST rationalization, subdued inflation, and accommodative monetary conditions.
- The recent depreciation of the INR can be attributed to several factors, including strong dollar demand from importers, limited foreign inflows, rising concerns over the trade deficit, and uncertainty surrounding the India-US trade agreement.
- Final estimates for agricultural production in 2024–25 point to a record foodgrain output, driven by higher yields of rice, wheat, maize, and moong. Oilseed production also rose, supported by gains in groundnut and soybean. Excess post-monsoon rainfall this year, coupled with reservoir storage levels reaching historic highs compared to previous years, bodes well for ongoing rabi sowing. These are expected to support rural growth and inflation print.
- India's growth story remains anchored in expectations of improved consumption, a renewed emphasis on domestic manufacturing, robust capital buffers in banks, and deleveraged balance sheets of large corporates, which bode well for medium- to long-term prospects. In the short term, growth risks arise from geopolitical tensions and economic slowdowns in key export markets. However, these challenges are balanced by strong high-frequency domestic indicators and ongoing infrastructure development.
- Our preference is to focus on established market leaders who are less susceptible to disruption and demonstrate the ability to innovate within their business segments, ensuring their leadership position and competitive edge remain robust. Sustainable value creation is a core principle of our investment strategy, which prioritizes companies with strong governance standards, high capital efficiency, defensible franchises with significant moats, and long-term growth potential.

Mr. Marzban Irani
President- Fixed Income Strategy

DEBT

Market Review

- The Hawkish tone of the FOMC (Federal Open Market Committee) in its minutes of the October meeting showed that there is a high bar for a rate cut in its next meeting that is in December. Most members preferred to wait and watch mainly due to labor market uncertainty and persistent inflation.
- System Liquidity throughout the month remained in sufficient surplus on the back on a lumpy G-sec maturity and 3rd tranche of CRR (Cash Reserve Ratio) cut at the beginning of the month.
- The Headline CPI (Consumer Price Index) Inflation came in at 0.25% for the month of October, which was in line with the market expectations and was lower than the September figure of 1.44%. The CPI Inflation continued to be below the 2% band for the 2nd consecutive month mainly driven by fall in prices of vegetables, pulses, spices and on account of GST rationalization.
- Core inflation and CPI (ex-food) continue to remain persistently over 4% at 4.42% and 4.17% respectively for Oct-25 driven by significant increase in prices of personal effects (gold, silver) by 23.88%. Fuel inflation for Oct-25 remained stable at 1.98% (Sep-25: 1.98%). Rural as well as urban reported easing of inflation in Oct-25, with rural print reporting a deflation of 0.25%. Urban inflation stood at 0.88%. The impact of GST Rate cut was evident across major categories in October mainly in electronics, clothing and footwear.
- GDP (Gross Domestic Product) for Q2 surprised on the upside with real GDP coming in at 8.2% vs market consensus of around 7.3%-7.5%. Nominal GDP came in at 8.7% led by a low deflator as both the WPI (Wholesale Price Index) and CPI continue to further trend downwards in Q2. This was largely driven by strong growth in both manufacturing and services.

Outlook

● Even as record low CPI has increased the clamor for a 25bp rate cut, the Q2 GDP number will have bearing on RBI's rate cut decision and we believe RBI will continue to monitor and rely on growth-inflation dynamics to determine the future course of monetary policy. RBI had front loaded liquidity easing through staggered CRR cut of 100bps, however, on account of forex operations and outflow due to increase currency in circulation, the core liquidity may tighten again in coming months due to statutory outflows and strong credit demand. RBI has already started to infuse liquidity through on-screen OMO (Open Market Operations) purchases to keep systemic liquidity in sufficient surplus to ensure effective transmission of earlier rate cuts.

First Tier Benchmark: Nifty 50 TRI

Minimum Investment (lumpsum):

For Subscription of units directly with Mutual Fund:

All direct transactions in units of the Scheme by Market Makers (MM) /Authorised Participants (AP) or other eligible investors with the AMC/the Fund shall be at intra-day NAV based on the actual execution price of the underlying portfolio. Any order placed for redemption or subscription directly with the AMC must be of greater than INR 25 Cr. The aforesaid threshold shall not be applicable for APs/MMs and shall be periodically reviewed. Each creation unit consists of 10,000 units of LIC MF Nifty 50 ETF. The Fund may from time to time change the size of the Creation Unit in order to equate it with marketable lots of the underlying instruments.

For Purchase / Sale of units through Stock Exchange:

As the Units of the Schemes are listed on NSE & BSE, an Investor can buy Units on continuous basis on the capital market segment of NSE during trading hours like any other publicly traded stock at prices which may be close to the actual NAV of the Scheme. There is no minimum investment, although Units are Purchased in round lots of 1 (one) Unit.

SECTOR ALLOCATION (% of NAV)

INVESTMENT OBJECTIVE

The investment objective of the Scheme is to invest only in and all the stocks comprising the NIFTY Next 50 Index in the same weights of these stocks as in the Index with the objective to replicate the performance of the Total Returns Index of NIFTY Next 50 Index. The Scheme may also invest in derivatives instruments such as Futures and Options linked to stocks comprising the Index or linked to the NIFTY Next 50 Index. The Scheme will adopt a passive investment strategy and will seek to achieve the investment objective by minimizing the tracking error between the NIFTY Next 50 Index (Total Returns Index) and the Scheme.

There is no assurance that the investment objective of the Scheme will be achieved.

LIC MF GOLD EXCHANGE TRADED FUND

An open-ended scheme replicating/tracking the performance of gold in domestic prices

Data as on last working day unless mentioned otherwise

SCHEME FEATURES

Scheme Type: An open-ended scheme replicating/tracking the performance of gold in domestic prices.

NSE Scrip Code: LICMFGOLD

BSE Scrip Code: 533719

Inception/Allotment Date: November 09, 2011

Fund Size:

AUM : ₹ 930.29 Cr

Average AUM : ₹ 892.72 Cr

Load Structure:

Exit Load - Nil

Liquidity: The Units of the scheme are listed on National Stock Exchange(NSE) & Bombay Stock Exchange Ltd.(BSE).

NSE Disclaimer: It is to be distinctly understood that the permission given by NSE Limited should not in any way be deemed or construed that the SID has been cleared or approved by NSE nor does it certify the correctness or completeness of any of the contents of the Scheme Information Document. The investors are advised to refer to the Scheme Information Document for the full text of the 'Disclaimer Clause of NSE'.

BSE Disclaimer: It is to be distinctly understood that the permission given by BSE Limited should not in any way be deemed or construed that the SID has been cleared or approved by BSE Limited nor does it certify the correctness or completeness of any of the contents of the SID. The investors are advised to refer to the SID for the full text of the 'Disclaimer Clause of the BSE Limited'.

First Tier Benchmark: Domestic Price of Gold

Minimum Investment (lumpsum):

Authorized Participants & Large investors – In creation unit lot of 1000 units and multiples of 1000 units thereof or in equivalent amount in cash. The AMC will not accept Portfolio Deposit (i.e. physical gold) from its investors. However, the AMC at its absolute discretion may accept Portfolio Deposit (i.e. physical gold) from Authorized participant subject to the satisfaction of conditions prescribed by the custodian appointed by the Mutual Fund for the custody of Gold.

As per Paragraph 6.12 of SEBI Master Circular for Mutual Funds the Scheme will offer units for subscription / redemption directly with the Mutual Fund for amounts greater than Rs.25 Cr at intraday NAV based on the actual execution price of the underlying portfolio on all Business Days during the ongoing offer period. The aforesaid threshold will not be applicable for Market Makers and will be periodically reviewed. The requirement of "cut-off" timing for NAV applicability as prescribed by SEBI from time to time will not be applicable for direct transaction with LIC AMC in ETFs by Market Makers and other eligible investors.

Other investors – On an ongoing basis, other investors may subscribe to the units of the Scheme by purchasing the units from the Stock Exchange where the Scheme is listed. Minimum size for subscription on the Stock Exchange – 1 unit or in multiples thereof.

Assuming ₹10,000/- invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. Load is not taken into consideration for computation of performance. The Mutual Fund is not guaranteeing or promising or forecasting any returns. The performance of the scheme is benchmarked to the Total Return variant of the index.

Past performance may or may not be sustained in the future. # Nifty Next 50 TRI, ## Nifty 50 TRI. Assuming ₹10,000/- invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. Load is not taken into consideration for computation of performance. The Mutual Fund is not guaranteeing or promising or forecasting any returns. The performance of the scheme is benchmarked to the Total Return variant of the index.

1. Base TER excludes additional expenses provided in Regulation 52(6A)(b) and 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996 and Goods and Services Tax (GST) on investment and advisory fees as per applicable rate. 2. Additional Expenses not exceeding 0.30% in terms of Regulation 52(6A)(b) of SEBI (Mutual Funds) Regulations, 1996. 3. Additional Expenses not exceeding 0.05% in terms of Regulation 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996. 4. Present GST rate is 18%. 5. Percentages mentioned above are annualized. 6. Base TER of direct plan shall have a lower expense ratio excluding distribution expenses, commission, etc., and no commission shall be paid from such plans. With reference to SEBI's letter no. SEBI/HO/IMD/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023, and AMFI Circular No. CIR/ARN-23/2022-23 March 07, 2023, the B-30 incentive structure for new inflows has been kept in abeyance with effect from March 01, 2023 till the incentive structure is appropriately re-instated by SEBI with necessary safeguards.

Disclaimer for Index TRI

(1) LIC MF Aggressive Hybrid Fund

As TRI data is not available since inception of LIC MF Aggressive Hybrid Fund, benchmark performance is calculated using composite CAGR of Nifty 50 PRI values from date 1-Jan-1991 to date 30-Jun-1999 and TRI values since date 30-Jun-1999

(2) LIC MF Flexi Cap Fund

As TRI data is not available since inception of LIC MF Flexi Cap Fund, benchmark performance is calculated using composite CAGR of Nifty 50 PRI values from date 15-Apr-1993 to date 30-Jun-1999 and TRI values since date 30-Jun-1999

(3) LIC MF Large Cap Fund

As TRI data is not available since inception of LIC MF Large Cap Fund, benchmark performance is calculated using composite CAGR of Nifty 50 PRI values from date 01-Sep-1994 to date 30-Jun-1999 and TRI values since date 30-Jun-1999

(4) LIC MF ELSS Tax Saver

As TRI data is not available since inception of LIC MF ELSS Tax Saver, benchmark performance is calculated using composite CAGR of Nifty 50 PRI values from date 31-Mar-1997 to date 30-Jun-1999 and TRI values since date 30-Jun-1999

	Moderate (Class II)			
	Relatively High (Class III)			
	*B-I - A Relatively Low Interest Rate Risk and Moderate Credit Risk.			

Application Amount for Fresh Subscription:

This is the minimum investment amount for a new investor in a mutual fund scheme

Asset allocation:

Investment of certain proportions of a portfolio in different assets classes like Equity, Debt, Gold etc..

Asset allocation for Equity:

The allocation is based on industry classification and not any separate sector classification.

AUM:

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Benchmark:

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-year Gsec.

Beta:

Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

Entry Load:

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry Load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs 100 and the entry load is 1%, the investor will enter the fund at Rs 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load:

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs 100 and the exit load is 1%, the investor will receive Rs 99.

Expense ratio:

The expense ratio is the annual fee that funds or ETFs charge their unit holders. It expresses the percentage of assets deducted each fiscal year for fund expenses.

Holdings:

The holdings or the portfolio is a mutual fund's latest or updated report statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Fund Manager:

An Employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Maturity profile:

Maturity is a term defined with respect to Debt Instruments which have fixed maturities after which they cease to exist on payment of the principal and the stipulated interest. A fund's profile consisting of the allocation of the value of assets in terms of percentage and their time left to maturity respectively is called a maturity profile. It gives a summary of the breakup of the value of assets with different specified maturities.

Minimum Additional Amount:

This is the minimum investment amount for an existing investor in a mutual fund scheme.

Macaulay Duration:

Macaulay Duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Modified Duration:

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Nature of Scheme:

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have subcategories.

NAV:

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Portfolio turnover ratio:

Portfolio turnover is a measure of how frequently assets within a fund are bought and sold by the managers. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets. Number of securities bought or sold (whichever is lesser)/Average AUM of the Fund.

Portfolio Yield:

Disclosure only required for Debt Funds.

Rating Profile:

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Risk Free Returns:

MIBOR rate for 1 day. To be sourced from FIMMDA (<http://www.fimmda.org>) for last day of the month.

Sector allocation:

Sector allocation may be defined as an allocation of funds in a certain percentage of the portfolio in different sectors of the economy.

Sharpe Ratio:

The Sharpe Ratio, names after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

SIP:

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. Its works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that the invests Rs 500 every 15 of the month in an equity fund for a period of three years.

SIP Return:

The SIP return calculation should be based on Rs. 10,000 invested every month. Returns would be 1 year, 3 year, 5 year, 7 year etc.

Standard Deviation:

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Tracking error:

Tracking error is the difference between the return fluctuations of an investment portfolio and the return fluctuations of a chosen benchmark. The return fluctuations are primarily measured by standard deviations.

Yield to Maturity:

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.
