How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund of the insurer, who manages investments of the scheme. He is usually part of larger team of fund managers and research analysts.

Application Amount for fresh Subscription: This is the minimum investment amount for a new investor in mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

SIP: SIP or systematic investment plan works on the principle of making periodic investment of affixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE 200, BSE 500, 10- year GSec.

Entry Load: A mutual fund may have a sales charge or load at the time of entry and / or exit to compensate the distributor / agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment.

For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101. As per Clause 10.4 of SEBI Master Circular dated June 27, 2024, There shall be no entry load for all Mutual Fund schemes and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit load: Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is Rs. 100 and the exit load is 1%, the redemption price would be Rs. 99 per unit.

Modified Duration: Modified duration is the price sensitivity and the percentage change in price for unit change in yield.

Macaulay Duration: It measures the average time that would be taken to receive the cash flows from the invested instrument. It is the weighted average term to maturity of the cash flows from an instrument. Macaulay Duration is a measure of interest rate sensitivity of a fixed income instrument. Higher the Macaulay Duration, higher would be the interest rate risk. For a detailed understanding of calculations, please refer page no 19 of SID of Mahindra Manulife Low Duration Fund.

Standard Deviation: Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or asset under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/ Securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held to maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

INDIA BREAKS OUT GROWTH, REFORMS AND MARKET MOMENTUM SIGNAL A NEW CHAPTER

India Breaks Out: Growth, Reforms, and Market Momentum Signal a New Chapter

November was a defining month for India's economic and market narrative. With real GDP growth at 8.2% and inflation plunging to a historic low of 0.25%, the stage is set for a potential RBI rate cut in our view. Political stability was reinforced by the NDA's emphatic Bihar victory, while labour reforms promise to reshape compliance and attract foreign investment. Equity markets responded with Nifty hitting a fresh high after 14 months, led by large caps and sectors like IT, Pharma, and Autos. Global volatility persists amid US economic concerns and AI valuation jitters, positioning India as a compelling hedge for global investors. Going forward, trade negotiations, budget cues, and monetary policy might be key drivers. For investors, Asset allocation could be critical focus on large caps for stability and may use hybrid strategies for balanced growth.

Source: Internal Research

EQUITY MARKET OUTLOOK

MOMENT OF THE MONTH:

- **Labour Reforms:** Indian government has notified labour codes covering wages, social security, industrial relations and working conditions. The reforms aim at easing compliance requirements, promoting the ease of doing business, laying the foundation for universal social security, defining a national floor wage, creating safe working environments and remunerative formal opportunities for workers. These codes could mark a significant shift in attracting foreign direct investments, boosting formalization and labour productivity while creating employment. Detailed rules, expected in near term, could help estimate the economic impact. One fallout of these codes could be reduction in workers' take-home pay and/or rising labour costs for employers (corporates).
- **Indian Economy Rock Solid:** India posted 8.2% real GDP growth in Q2 FY26, defying tariff headwinds, supported by festive consumption and reforms. Nominal GDP growth however was low at 8.7%. Inflation fell to a historic low of 0.25% in October, strengthening expectations of an RBI rate cut in December, in our view. Services Purchasing Managers' Index (PMI) stayed resilient at 59.5 however, Manufacturing PMI slipped to 56.6, its weakest in nine months, as US tariffs weighed on exports.
- **NDA Sweeps Bihar:** The National Democratic Alliance (NDA) swept the polls, winning 202 out of 243 seats, its biggest mandate in 15 years. The BJP emerged as the single-largest party with 89 seats, while Janta Dal(U) secured 85 seats, marking Mr. Nitish Kumar's record 10th term as Chief Minister of Bihar.
- **Not all good with US Economy:** Data released post US government opening on Nov 12, 2025 saw a spate of data releases which showed **Consumer Price Index (CPI)** being persistent at 4.1%YoY. However, consumer confidence fell sharply to its lowest level and unemployment rates started inching up to 4.4% for Sept 2025.

Source: Bloomberg

WHO MOVED MARKETS

- FPIs were neutral for the month of November and continue to participate in primary market through IPOs. As India's economic data and earnings outlook improves we need to see if the FPIs turn favourable towards Indian equities post a reasonable time correction of 14 months.

Source: Bloomberg; Data as on November 30, 2025

THE FIXED INCOME GLANCE

- The 10-year benchmark G-Sec yield averaged around 6.52% in November, moving within a narrow band of 6.48%-6.56%. While the market remained in a narrow band, Market sentiment remains constructive as the RBI Governor had hinted at a December cut. However, a strong Real GDP growth for the second quarter dented sentiments and the dilemma of rate cut continued. Liquidity remained a corporate bond issuance stayed strong, particularly in the 2-5-year segment, supported by institutional demand.

Inflation, Currency & Macro Trends

- India's CPI inflation for November remained subdued at 0.25%, driven by food deflation, while core inflation hovered near 4.4-4.5%. Manufacturing PMI stood at 56.6, indicating robust activity despite global trade headwinds.
- INR continued to remain weak vis a vis the dollar in an absolute term and also relatively within the Asia / Emerging market basket
- The US markets have priced in a December rate cut by the Fed, but would watch out for the US Fed Governor speech. The U.S. CPI held near 3.0%, and Eurozone inflation stayed around 2.2%, reinforcing expectations of continued monetary easing.

Source: RBI

WHAT NEXT?

Economy Check

India Economy

- GST collections for November stood at ₹1.7 trillion, a 0.7% YoY increase due to sweeping tax cuts. Net GST collections came at ₹1.52 trillion, a 1.5% YoY increase.
- Index of Industrial Production (IIP) growth in October flat at 4% versus September. Manufacturing sector grew at 4.8%, Mining was flat, Electricity grew by 3%.
- India's CPI inflation was 0.25% year-on-year for October 2025, a historic low. Food inflation was -5.02%, also a record low for the current series.

- India-US tariff negotiations continue with expectations for early closure.
- Indian rupee made a new low at 89.59 against US \$.
- Fiscal deficit for Apr-Oct FY26 reached ₹8.25 trillion, ~52% of the full-year target. The widening is due to higher capex and lower-than-expected tax collections. Non-tax revenues remained strong, led by RBI dividend and telecom spectrum receipts.

Source: Internal Research

Markets

- Nifty finally made a new high in November 25 after 14 months of volatile movement. Nifty gained 1.9%, Sensex rose 2.1%, Midcap index up 2.0% while Small cap index declined 3%.
- India Q2 results were a positive surprise vis a vis the moderate expectations. Universe of NSE500 companies recorded a YoY growth in revenue & Profits at 6.5% and 15.4% respectively. Aggregate Profits grew by 17.6% yoy, excluding the loss-making companies. Sectorally, BFSI companies recorded 7.3% growth in Profits, commodity companies grew profits by 64% while the non-BFSI & non-Commodity companies grew 10% yoy. Earnings when seen across the spectrum of Large, Mid and Small Caps, grew by 10%, 31% & 36% respectively.
- Global markets were volatile. US indices posted sharp swings in the results seasons with fears of economic impact from shutdown and overheated rally in AI stocks like Nvidia. SPX is flat and Nasdaq is down 1.5% for the month. European markets and Hangseng ended flat. Japan's NIKKEI was down 4% for the month. Market watchers are closely tracking the AI stock rally and India is emerging potentially as a hedge against this.
- Among the Nifty sectoral indices, Nifty IT, Pharma, Autos and Banks outperformed while Auto, Media and FMCG underperformed Nifty.
- Domestic Flows: Active equity funds flows dipped 18% MoM to ₹24,700 Crore. Gross SIP flows in October 2025 were steady at ₹29,500 Crores. Mid & Small-Cap inflows were steady at ₹3800Cr and ₹3500Cr respectively.

Source: Bloomberg Data as of November 2025

Outlook

- Concerns on AI valuations amidst the heavy potential capex requirements for top AI players has emerged amongst global investors. Fear of stretched Balance sheets and excess capacity bubble caused significant volatility in the tech-heavy markets globally. As the AI rally seems to be getting a reality check, we are seeing IT service companies rally as narratives on large scale AI implementation gains momentum. Also, they may seem to be a hedge to the entire AI theme. In a way, Indian economy and markets too could be a safe area for global investors who are looking for a hedge against the excesses of AI valuations. A country with 1.45 bn population runs a perceived risk of losing out on employment if and when AI really plays out in the real economy.
- India witnessed several positive triggers during the month — from the emphatic Bihar election victory to an impressive real GDP print. The Nifty responded, breaking out to a fresh high after 14 months of consolidation. Indian markets look reasonably valued relative to other emerging markets as the consolidation in India is matched by significant rally in other emerging markets.
- Going ahead, key positive catalysts for Indian markets could be trade deal with the USA, dovish RBI stance & budget expectations, and global investors looking to diversify amidst stretched AI rally globally. Rising bond yields in Japan need to be monitored as a potential headwind for risk assets. Japan has been seen as a source of funding fuelling the asset markets globally. Impact of tariffs on inflation and interest rates in US is another variable that could hurt risk assets. Change in Governor at US Fed and US Supreme Court ruling on Tariffs could also influence markets.
- Over past 2 years, Indian investors have been a steady source of demand for equities (mutual funds as well as direct). This demand played a role in supporting markets in CY24. In CYtd25 the supply of equities from Corporate India (primary) as well as promoters/PEs/VCs (secondary) has matched the demand. Rising supply while being good for economy when corporates use for capex and growth does put some pressure on existing securities as investors look to adjust portfolios.
- We believe asset allocation remains key for investors in their journey of wealth creation. The allocation is applicable to both equity as an asset class as well as choice of market capitalization within equities. From investors perspective, we continue to believe as an aggregate large cap offers better value and margin of safety as compared to micro caps & small caps & mid-caps. The risk to large caps remains in further selling by FPI's as they primarily own large caps.
- Investors with near-term objectives or low risk appetite can opt to prefer Equity Hybrid Funds or multi asset allocation funds. Investors with a longer-term horizon could continue to remain invested with fresh equity allocation towards large caps.

Source: Internal Research

SUMMARISING OUR THOUGHTS

- We believe that a large part of the downward trend in domestic rates have already happened. Any large rate downward movement may be a result of an exogenous shock or the domestic economy moving to an extremely slow growth
- While we have reduced duration across our duration-oriented funds, we have taken incremental positions in State Government Securities, as we believe the existing spreads offer a decent margin of safety."
- We would be wary of inflation, predominately the commodities basket to potentially move up possibly moving up the wholesale inflation numbers and possibly feeding into core inflation.

MARKET CAPITALIZATION (% of Equity Holdings)

Data as on November 30, 2025

As per the latest Market Capitalisation data provided by AMFI
(In line with the applicable SEBI guidelines)

Mahindra Manulife Multi Cap Fund

(Multi Cap Fund- An open ended equity scheme investing across large cap, mid cap, small cap stocks)

Investment Objective

The investment objective of the Scheme is to provide medium to long term capital appreciation through appropriate diversification and taking low risk on business quality. The diversified portfolio would predominantly consist of equity and equity related securities including derivatives. However, there can be no assurance that the investment objective of the Scheme will be achieved.

Fund Features

Prudent portfolio of investments across companies and sectors.

Actively managed by professional fund managers for potential long term capital appreciation.

Opportunity to participate in successful businesses through equity market.

Mahindra Manulife Small Cap Fund

(Small Cap Fund - An open ended equity scheme predominantly investing in small cap stocks)

Investment Objective

The investment objective of the Scheme is to generate long term capital appreciation by investing in a diversified portfolio of equity & equity related securities of small cap companies. However, there can be no assurance that the investment objective of the Scheme will be achieved.

Fund Features

Potential growth tailwinds in Indian Economy.

Opportunity to capitalize on Indian Entrepreneurship.

Opportunity to capture market / economic cycles.

Potential to create wealth and generate alpha over long-term.

Small caps are generally under-researched and under-owned and hence provides an opportunity for stock-picking at reasonable valuations.

Small Caps could be beneficiaries of structural reforms announced from time to time.

Small caps also provide exposure to companies which are potential market leaders in the industries they operate in (a few examples include textile, paper, sugar, luggage) and have potential to become midcaps of tomorrow as they achieve scale.

Mahindra Manulife Business Cycle Fund

(An open ended equity scheme following business cycles based investing theme)

Investment Objective

The Scheme shall seek to generate long term capital appreciation by investing predominantly in equity and equity related securities with a focus on identifying and investing in business cycles through dynamic allocation between various sectors and stocks at different stages of business cycles in the economy. However, there is no assurance that the objective of the Scheme will be realized.

Fund Features

Business Cycle fund aims to identify and invest in select sectors based on the market and economic dynamics.

Skilled fund managers can strategically rotate the portfolio's sectoral allocation to capture outperformance during specific phases of the business cycle.

The Funds are designed to be flexible and adaptive to changing economic & market conditions.

Investing in a business cycle fund allows investors to participate in the growth potential of different sectors and industries as the economy progresses through different phases of the cycle.

Mahindra Manulife Value Fund

(An open-ended equity scheme following a value investment strategy)

Investment Objective

The investment objective of the Scheme is to generate long-term capital appreciation from a diversified portfolio of predominantly equity and equity related instruments of companies which are undervalued (or are trading below their intrinsic value). However, there is no assurance that the investment objective of the Scheme will be achieved. The Scheme does not guarantee/indicate any returns

Fund Features

Markets (Asset Allocation): Transitional crisis or uncertainties may create opportunities in the broader markets

Markets become cheaper, allowing for a potential increase to equity allocation across market caps in portfolio and vice versa.

Sectors: Temporary changes such as price shocks in raw materials, international disruptions, government policies, regulatory changes etc.

These factors may tend to hurt near term profitability and valuations without changing longer term dynamics of the sector

Individual Stocks Short term issues (on pricing, demand-supply margins), management changes, regulatory matters and business turnarounds

Unlocking value through restructuring, mergers and acquisitions

Mahindra Manulife Balanced Advantage Fund

(An open ended dynamic asset allocation fund)

Investment Objective

The investment objective of the Scheme is to provide capital appreciation and generate income through a dynamic mix of equity, debt and money market instruments. The Scheme seeks to reduce the volatility by diversifying the assets across equity, debt and money market instruments. However, there can be no assurance that the investment objective of the Scheme will be achieved.

Fund Features

Optimal asset allocation at regular intervals.

Aims to capture the optimum mix between Equity and Debt across market cycles.

With flexibility to invest upto 100% in equity & debt, the Scheme may be suitable for volatile market conditions.

Endeavours to provide tax efficiency*

*Though the scheme is a dynamic asset allocation scheme, the endeavour will be to invest a minimum of 65% of its net assets in equity and equity related instruments which may help in attracting equity taxation as per prevailing tax laws.

Fund Manager and Experience

ASSET ALLOCATION

(% to Net Assets)

Data as on November 30, 2025

MARKET CAPITALIZATION

(% of Equity Holdings)

Data as on November 30, 2025

As per the latest Market Capitalisation data provided by AMFI (In line with the applicable SEBI guidelines)

Mahindra Manulife Arbitrage Fund

(An open ended scheme investing in arbitrage opportunities)

Investment Objective

The investment objective of the Scheme is to generate income by predominantly investing in arbitrage opportunities in the cash and derivatives segment of the equity market and the arbitrage opportunities available within the derivative segment and by investing the balance in debt and money market instruments. However, there can be no assurance that the investment objective of the Scheme will be achieved.

Fund Features

Relatively lower risk as arbitrage strategy focuses on protecting downside risk by capturing market spreads

Better tax efficiency on returns compared to short term debt funds

One of the least volatile hybrid schemes that is suitable for investment across market cycles

1 Cash & Cash Equivalents includes Fixed Deposits, Cash & Current Assets and TREPS. 2 Yield to maturity should not be construed as minimum return offered by the Scheme. 3 Includes additional expenses charged in terms of Regulation 52(6A)(b) of SEBI (Mutual Funds) Regulations, 1996 and Goods and Services Tax. Please refer Pg. no 35 to 43 of Factsheet for complete details of Scheme performance as per SEBI prescribed format.

Mahindra Manulife Liquid Fund

(An open ended liquid scheme. A relatively low interest rate risk and moderate credit risk.)

Investment Objective

The Scheme seeks to deliver reasonable market related returns with lower risk and higher liquidity through a portfolio of money market and debt instruments. However, there is no assurance that the investment objective of the Scheme will be realized and the Scheme does not assure or guarantee any returns.

Fund Features

Low volatility: Relatively safer during times of high market volatility as liquid funds usually invest in Commercial Papers, Certificate of Deposits, CBLO/ Repos and in short term debt instruments with maturity profile of not more than 91 days.

Easy liquidity: Investors can invest in liquid funds even for a day.

Cash Management Tool for treasuries of any size: Optimal utilization of idle cash for cash management purposes.

Fund Manager and Experience

Fund Manager: Mr. Rahul Pal

Total Experience: 22 years

Experience in managing this fund: 9 years and 5 months (managing since July 04, 2016)

Fund Manager: Mr. Amit Garg

Total Experience: 19 years

Experience in managing this fund: 5 years and 6 months (Managing since June 8, 2020)

Mahindra Manulife Low Duration Fund

(An open ended low duration debt scheme investing in instruments such that the Macaulay duration of the Portfolio is between 6 months and 12 months (please refer to page no. 19 of SID). A relatively low interest rate risk and moderate credit risk.)

Investment Objective

The investment objective of the Scheme is to provide reasonable returns, commensurate with a low to moderate level of risk and high degree of liquidity, through a portfolio constituted of money market and debt instruments. However, there is no assurance that the investment objective of the Scheme will be realized and the Scheme does not assure or guarantee any returns.

Fund Features

- Positioned between liquid funds and short-duration funds with respect to the risk-return matrix.
- Potentially better returns than that of liquid funds through strategic shifts in the maturity profile.
- Lower volatility through relatively lower duration than short duration funds.
- Higher flexibility in asset allocation vis-à-vis liquid funds.

Mahindra Manulife Dynamic Bond Fund

(An open ended dynamic debt scheme investing across duration.
A relatively high interest rate risk and moderate credit risk.)

Investment Objective

The investment objective of the Scheme is to generate regular returns and capital appreciation through an active management of a portfolio constituted of money market and debt instruments across duration. However, there is no assurance that the investment objective of the Scheme will be realized and the Scheme does not assure or guarantee any returns.

Fund Features

Mahindra Manulife Dynamic Bond Fund endeavours to take advantage of interest rate movements. With the flexibility to counter a dynamic environment, the Scheme aims to generate regular returns and capital appreciation through active management of portfolio in line with the evolving interest rate scenario.
