Note: Data as on 30th November 2025

How to read the Factsheet

Date of Allotment

The date on which units are allotted to investors following a New Fund Offer (NFO).

Fund Manager

An employee of the Asset Management Company (AMC) who is responsible for managing the investments of the fund.

Assets Under Management (AUM)

The total value of investments that the AMC manages in a specific fund.

Minimum Application Amount

The minimum amount that a new investor must subscribe when investing in the fund.

Additional Purchase Amount

The amount applicable when an existing investor wants to invest more money, beyond the initial subscription.

Total Expense Ratio (TER)

The percentage of the AUM charged by the AMC to cover investment and operational expenses.

SIP

Systematic Investment Plan (SIP) is an organized way of investing in Mutual Fund. It helps in building long term wealth through a disciplined approach of investing at pre-defined intervals ranging from daily, weekly, monthly and quarterly.

NAV

Net asset value or NAV is the value per unit of the fund held by investor as on the reporting date. NAV is calculated every business day by dividing total investments net of expenses by total units of the fund. An investor will enter and exit the fund at NAV as on that date.

Benchmark

Typically refers to an index, whose performance is used as a standard or benchmark to assess the performance of a specific fund. Examples of benchmarks are Nifty 50, Sensex, BSE 200, BSE 500, and 10-year Gsec.

Exit load

When an investor redeems mutual fund units within a specified period, exit load is charged. On redemption, exit load is subtracted from NAV payable to the investor.

Asset allocation and holdings

Details of investments made by the fund in multiple securities classified by rating and asset classes (debt, equity etc.)

Rating

Rating refers to grading of a company provided by registered rating agencies based on its ability to repay their debt considering multiple factors, AAA being the highest safety followed by AA, A and BBB.

Macaulay Duration

Macaulay Duration is a measure of how long it takes for the price of a bond to be repaid by its cash flows.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Average Maturity

Refers to the specific date on which a debt instrument matures. Average maturity refers to the weighted average maturity of all debt instruments held in the fund.

Yield to Maturity

The yield to maturity or YTM is the rate of return anticipated on a bond if held until maturity. It is expressed as an annual rate.

Cash-futures arbitrage

A strategy where a long cash equity position is completely hedged with a short equity futures position, thereby locking in a spread. This is considered a low-risk strategy.

Simple annualized returns

Simple annualized growth rate is calculated as $(\text{Ending value} / \text{beginning value} - 1) * 365 / \text{Number of Days}$
